

Using Individual Learning Plans (ILP) to Enhance Learning and Teaching

Background: ILPs are a requirement for adult learners of Essential Skills in Northern Ireland.

Focus: Developing and reviewing ILPs within the time constraints of an Essential Skills course

Solution: This half day, in-service workshop explores a variety of practical activities for use in the classroom to develop effective individual learning plans and review progress in learning. We explore approaches that will minimise the administrative burden for the tutor but NOT the impact on learning!

Feedback from tutors:

“Very informative, Jill made me feel comfortable and confident to ask questions if necessary”.

“A well-presented session with good examples of good practice”.

“Fantastic, more of this please”.
