

Partnership

In 2011, Jill Brown (LTAS) designed and successfully applied for European funding for a Leonardo Partnership project entitled, “Sharing best practice in the development of mathematical competence in the vocational classroom”. Jill selected partners from a variety of backgrounds, expertise and experience but who shared the same aspirations for excellence in the teaching and learning of mathematics.

These partners are from:

- CSV Sydøstfyn, Denmark

- Aarhus Universitet, Denmark

- Vaasan ammattopisto - Vasa yrkesinstitut, Finland

- Learning and Teaching Scotland, United Kingdom

- Hogeschool Utrecht, Netherlands

The project concludes in 2013.

LTAS is interested in leading and participating in partnerships with organisations committed to quality improvement in education and skills. For further information, please contact us through the contact page.
